Workshop

leanXcam-Workshop

Introduction to software and hardware,
application development on leanXcam with
the Oscar framework

Sept 23th 2010
Jan 24th 2011
May 23th 2011

1:00 PM to 5.30 PM
at SCS,
Technopark Zurich

Followed by aperitif

Workshop

Supercomputing Systems is pleased to announce a new edition of our leanXcam start-up workshops.

The goal of the event is to give an introduction in working with leanXcam and to convey basic know-how for designing, developing and debugging applications.

The workshop allows the participants to understand the different concepts of the leanXcam smart camera, to install the development environment and to implement and test simple example applications. Furthermore, the Oscar Software Framework is presented and the development and debugging techniques are explained.

The cost of the work shop including a leanXcam starter kit are 550\$. Participants who bring their own leanXcam are only charged 300\$. To be able to make full use of the taught content, elementary programming skills as well as limited user experience with the Linux shell prompt are required.

The work shop takes place with 5 - 10 participants on September 23th 2010, January 24th 2011 and May 23th 2011 always between 13:00 and 17:30 in the office of SCS at the Technopark in Zurich.

The course material is english, but the oral course language will be german. If you are interested in english-only workshops, please contact us and we get back to you as soon as we have enough candidates for such an event.

To subscribe, you can fill in the application form on this page and mail it to us by fax or mail. Alternatively, you can use the contact link on the SCS web page under '<http://www.scs-vision.ch/en/leanxcam/workshop.html>'.

Application

I would like to participate in the workshop on the following date:

Sep 23th 2010 Jan 24th 2011 May 23th 2011

Name: _____

Address: _____

E-Mail: _____

Company: _____

I already own a leanXcam and will bring it with me.

In the full course price of 550\$, a leanXcam is included. If you already own a leanXcam, the cost is reduced to 300\$.

I will not come until 14:00 since I already have the most recent leanXcam SDK.

I will bring my own laptop with the following operating system installed:

Ideally you bring your own laptop to install the development environment on. The minimum requirements are 1GiB of RAM (though 1.5 GiB are better) and 13 GiB of free hard disk space.

Also, you need administrator permissions.

Windows XP Windows Vista Windows 7 MacOS X

Linux Distribution:
